For more information and programming tips, see n the Unlock Bypass Developer's Guide. Download free blackberry codes calculator v1.8.4. For more information and programming tips, see n the Unlock Bypass Developer's Guide. Q: Neo4j - how to search in results of a query I have following scenario. Products has many tags. Example of PRODUCTS and ITEM TAG: The query allows me to find product that contains a specific tag. For instance: RETURN c WHERE c.name="Product" MATCH p = (n)-[r]->(m) WHERE ANY(x IN r WHERE x.name=tag) RETURN p But the returned result does not contain the queried tag in the name field. The expected result would be: {name:"Product",tags:[tag1,tag2]} A: Try this query: MATCH (p:Product) WHERE ANY(x IN p.tags WHERE x.name=tag) RETURN p You are using the query syntax in your question. If you want the products with the given tag you need to use the WHERE clause with the result of the query returned by this. That is, change MATCH p = (n)-[r]->(m) to this MATCH p = (n)-[r]->(m) WHERE ANY(x IN r WHERE x.name=tag). Then you can use the RETURN clause with this result set. Menu You are here For Immediate Release Salmon Council's Chief of Staff Appointed to Senate Veterans Affairs Committee WASHINGTON — Today the U.S. Senate Committee on Veterans' Affairs announced it has appointed Dr. Albert Kim as the committee's chief

Blackberry Codes Calculator V1.8.4 Download

blackberry code calculator v1.8.4 download . Download Blackberry - Meaning, origin and more on the IdiomZone.com blackberry code calculator v1.8.4 download, where English Language.
