Q: how to retrieve data from second database in Java? I have two databases namely one in SQL Server and one in mysql server.I want to retrieve data from SQL server's database.I have written a sample code. But it is not working and it is giving error

```
"org.springframework.jdbc.BadSqlGrammarException: PreparedStatementCallback; bad SQL
grammar [SELECT * FROM WHERE =?]" The table name is different.But It is same in both databases.I
just want to do a simple select statement. How to fix this? String queryString = "SELECT * FROM
database_1.table"; System.out.println(queryString); ResultSet rs =
db.getConnection().prepareStatement(queryString).execute(); while(rs.next()) { String
queryString1= "SELECT * FROM database_2.table"; System.out.println(queryString1); ResultSet rs1
= db.getConnection().prepareStatement(queryString1).execute(); while(rs1.next()) { String
queryString2= "SELECT * FROM database_2.table"; System.out.println(queryString2); ResultSet rs2
= db.getConnection().prepareStatement(queryString2).execute(); while(rs2.next())
```

Francisco is a "strong conservative," Trump's choice said in a statement on Saturday. He expressed his determination to serve as solicitor general and promised to "faithfully discharge the duties of that office." "I urge my fellow senators to confirm President Trump's nomination of a strong conservative to the United States Supreme Court," Francisco said. "I look forward to working with the majority leader and the entire Senate to confirm Justice Gorsuch as soon as possible," he said. Gorsuch, meanwhile, met with incoming White House counsel Don McGahn at the Supreme Court on Saturday, a move that was a first step to helping build a team of like-minded legal minds to lead the new administration. Prior to joining a judge-packed Supreme Court in October 2001, Gorsuch was a Harvard Law Review editor and professor of law for 20 years. He clerked for the late, conservative Justice Antonin Scalia and has served on the court's powerful 10th Circuit. "It was a great honor to d0c515b9f4

Donning black and white suits, we got together for a sit down interview with Pete Lau, founder of Yabai Brand. Pete Lau speaks at the launch of Yabai's new collection Yabai has been in the DIY and craft scene for a while now, getting their ingredients from Japan, UK and Italy. Before I ask him about their recent news of the new collection, I start with a chat about their first ever Charity event. How did it come about and how was it received? Pete said 'The launch was well received, it was interesting that the staff didn't know who Daniel Etter was, they didn't know what Yabai was. They were made aware of the brand and what we do through the media and social media. It was a great reception, we were overwhelmed with the people at the event.' But who got the best seats when judging it by quality, cuteness, speed of service and speed of production? The little bear on the cat (see image below)! This was a make or break moment, as the staff had to prepare the Yabai tote bags for the event on the Tuesday. You'd have thought the staff would have had years of experience of creating tote bags and other products, but they were actually creating them for the first time in the making. The whole staff worked on the bags, either on the big screen or through computers. This was all done with great skill, we had to applaud what they were doing

The attitude, for the Spanish, is part of our personality and a feature of our inner self. We also build attitude in the team, in the group, in the company. In economics, attitude is associated with the way the customers or clients of a company or business behave towards the business. There is a difference between positive attitude in economics and market foreclosures. These two concepts are clearly different. The most common problems of market foreclosure are foreclosed the time, price, and the products. The attitude of customers plays an important role in the success of a business. . What do we mean by attitude of customers? The attitude of customers, is the emotional reaction that the customers have toward the products or products offered to them. If the customers have negative attitude towards a product, they will not buy it. If the customers have positive attitude, it means that they are attracted by the product. The attitude of customers has an effect on sales. The positive attitude of customers will increase sales and the negative attitude of customers will cause dissatisfaction among the customers and will lead to low sales or even loss. .
