## GoToTags Windows App

GoToTags is a useful app that enables computer users to easily create and read NFC tags on their PCs. The application was designed to work with NFC readers (e.g. smart phone, USB, Bluetooth, etc.) in order to display the content of the tag. This app also enables users to perform various actions on the tags, such as displaying contact details or launching a mobile application.

**GoToTags Windows App Crack Features:**

- Read and Write NFC Tags - You can read and write NDEF formatted NFC tags using GoToTags.
- Your NFC reader must be connected to the computer in order to use the app.
- You can use the app in order to scan a variety of NFC tags with the exception of the Muvi Tag.
- You can also use the app to write multiple different NDEF formatted tags to the same tag.
- Automate NFC Tag Actions - You can use GoToTags to automate NFC tag actions. For instance, you can make the app open a website in your browser when you read a tag with the URL - GoToTags will open a website if it can open one using the AppChooser library. If it cannot, the AppChooser will open a browser.
- You can use the app in order to add and edit NFC tag actions.
- New actions can be added using the Add New Action button.
- The default action is the only one defined by the app, but users can edit it.
- Perform Internet Queries - You can use GoToTags to perform Internet queries. For instance, you can make the app open a website in your browser in order to perform a search in Google.
- The app also enables users to perform a search in Bing.
- Open Other Applications - When the user reads a tag, the app can open the default browser and perform the tag action automatically, or open other applications, such as a contact's detail app or a mobile app.
- Add New Tag Action - You can use the app to perform various actions on the NFC tag. For instance, you can make the app launch a contact list or launch a browser.
- New actions can be added using the Add New Action button.
- Save Tags - The app enables users to save the NFC tags they read.
- The tags are saved in the tags folder inside the Application Data folder.
- Tags can be selected and filtered based on various tags elements, such as the UID
