IP Messenger 10.0.1 IP Messenger 10.0.1 IP Messenger 10.0.1:Efficient messenger client that lives within your computer's trayMessenger client that runs silently in your system tray and notifies you when a new message is received. The context menu reveals multiple options, where you can access the log and set a custom status for when the computer is idle.Click on the tray icon reveals a list of all the connected workstations that you can initiate a conversation with (the application detects the users that have IP Messenger installed on their system), together with their corresponding group, host name and IP address. Send messages and files with just a few mouse clicksWhen receiving a message, you can either open it, close it or reply to the interlocutor. In order to protect your privacy, the communication can be password-protected and messages can be encrypted. In addition, IP Messenger enables you to quickly and easily transfer files and folders to other computers in the

IP Messenger Crack + With Serial Key For PC

IP Messenger is a LAN messaging client software that was developed and designed for IT administrators, who need a compact, efficient, multi-purpose messaging program that allows them to keep in touch with their colleagues, while at the same time maintaining a high degree of security when sending and receiving messages. IP Messenger allows you to easily send and receive messages, complete with a message status, an action log, and context menus. Through these utilities, you can set different log levels for the message transmission status. This way, you will be able to always be aware of message transmission and reception, and that way improve your work. IP Messenger includes a file transfer utility, which gives you the ability to store and send files from one computer to another. Through the use of the user search option, you can easily find the remote IP address of any user that you want to talk to. In addition to the LAN messaging capabilities, IP Messenger can be used in other ways: as a desktop background image viewer, for managing application and system updates, and as an easy-to-use utility for sending Windows events and messages.
