Icon Tray Keygen Full Version

To quickly launch Explorer from any folder of your choice. When I first installed Icon Tray, I chose to have only the month, date, and the week displayed in the Icon Tray. But now, I often find myself in a situation where I want to know the current day, month, and date. Then, I realized that there is an added benefit when all three are displayed in the Icon Tray. I can quickly jump to any day or any day of the week by pressing the icon(s) of my choice. It is possible to have Icon Tray display any combination

of month, day, and date. So, if you happen to live in France or Germany, for example, and wish to have the date format differently, then Icon Tray is the perfect tool. Customization: Icon Tray comes with two pre-defined layouts, which are ideal for the U.S. and the U.K. Users can customize the date format and the current wallpaper. You can also create a new layout by dragging and dropping icons from any folder on your desktop. You can even drag and drop different date/month/day combinations. You can then save your layout to the registry. If you have a better and/or easier way of displaying the current month, day of the month, and date in the Icon Tray, let me know. I would love to hear about it. This is a trial version. You can support the developers by purchasing a license. Please visit for more details. License: This application is free. Icon Tray is an add-in utility that will display the current month, day of the month, and date of the week in the System Tray of the Taskbar. You can select to display all these three items or any combination in any order you wish (ideal for foreign users who use different date format than the U.S standard). This comes in handy when you need to know the date immediately. Sure, you could leave the mouse over the digital clock in the lower right corner of the Icon Tray, and wait a couple of seconds, but I found it's not too convenient. Tired of staring at an existing desktop wallpaper day after day? Why not having a different wallpaper everyday (how about looking at a different picture from a folder containing your favorite photos everyday.) You can even have Icon Tray switch to a different photo wallpaper as often as every 5 or 10 seconds. It s like having a slide show desktop wallpaper. Icon Tray also allows you to quickly launch Explorer from any folder of your choice. Do you like this program? Please consider leaving a rating or becoming a free user! "What do you want to do?" "I want to talk about the ins and outs of computer security and antivirus software", you say. "What?" "So I'm wondering if anybody else has ever had this problem...", you say. Generally, only "talk" groups are really productive, and they are generally less than a year old. Anything older than two or three years is a waste of your time. You can get good advice from newsgroups, but only from users that have had your same problem and solved it for themselves.
