MoreDB Lite Description: The program is designed for the administrators that require basic information about the performance of the database. Note: The program can be used for free until September 30, 2012. If you require more features you can request a quote on this page. PDQ is a powerful and easy-to-use professional performance diagnostic and tuning tool that makes managing performance issues in DBAs lives easier. PDQ is designed to help the DBA, application developer, and server administrator work together to bring the best performance to the application, server, and database. It can manage performance issues associated with many Oracle database products, including Oracle 9i and above, Oracle9i with MOS, Oracle9i with ODT, and Oracle10g. The tool provides an easy-to-use interface for directly displaying the most problematic items in the database and the most significant bottlenecks that are taking up CPU time. It analyzes the system and database, and it is especially helpful in detecting and troubleshooting latent disk I/O problems, in locking, caching, memory, and contention issues, and in reducing CPU bottlenecks. PDQ can be integrated into an Oracle database to provide automatic analysis and alerting. A set of rules in a trigger can be integrated in an Oracle database to monitor, analyze, and alert when certain conditions are met. The tool provides a non-technical user interface that allows for easy performance tuning. PDQ also provides a framework for performance problem analysis and a method for reporting, analyzing, and troubleshooting performance issues. This is made possible through the simple definition of rules that can be set in the configuration database. You can find more information about the various configuration options on the PDQ Web site. PDQ Features: Trace and monitor a database Display problem

System Requirements For MoreDB Lite:

Minimum: Windows Vista, Windows 7, or Windows 8, 64-bit edition, or later. OS: Windows 7, 32-bit edition. Mac OS X 10.6.8 or later. Mac OS X 10.8 or later. Linux x64 (Ubuntu 12.04 or later). Minimum: Windows Vista, Windows 7, or Windows 8, 64-bit edition, or later. OS: Windows 7, 32-bit edition. Mac OS X 10.6.8 or later.
