Reuploaded and quality/size increased torrent of the movie Q: Xcode 11/Swift 4 @objc protocol extension parameter of type self I am trying to understand @objc protocol extension (e.g. read some good posts here for more info) I have a protocol Test that has two parameters :@objc protocol Test { func test(text: String, textAfter: String) -> () -> String { return { print("text before: \text) and text after: \textAfter") } } } extension Test { @objc func test(_ text: String, textAfter: String) -> () -> String { print("text before: \text) and text after: \textAfter") } } func testStrings() { self.test("This is second string") } } That works fine. Now I tried to make the textAfter parameter as optional and am trying to do the following : @objc protocol Test { func test(_ text: String, 3e33713323
