SomeObject Desktop [Mac/Win] [2022-Latest]

SomeObject Desktop allows you to develop and run Windows desktop applications, standalone without any installation. SomeObject Desktop is a completely open and FREE platform. It is fully hardware

accelerated and designed to use DirectX8 or OpenGL.

Code in Java, C++, ActionScript and other languages are equally enabled on the platform.

SomeObject Desktop is offered as a single binary.

Application: SomeObject Desktop is a consumer application that let you develop and run Windows desktop applications - standalone without any installation. Software

Rendering: Java is a common and open development platform. However, development cost is expensive. Low-end Java applets are very slow, even the embedded graphics support is limited. The code is largely closed and performance is limited. SomeObject Desktop uses MesaGL software rasterizer for fast performance. SomeObject Desktop uses the Phylite SDK to wrap the

application for hardware accelerated 3D rendering. With Phylite SDK, the code is closed, so performance and development cost is low. Phylite SDK adapts better to the hardware for maximized performance. Big

Objects: SomeObject Desktop allows to create big objects - GUI, Multimedia and Games - in one programming language.

Easy Deployment:
SomeObject Desktop is a

ready to use Java Desktop applet. You can deploy directly from One-Click. It is directly deployed to the Windows tray bar. The application icon is placed in the Windows tray bar without any installation.

Easy Maintenance:

SomeObject Desktop comes with a full and thorough documentation. The code is readily available to be modified, extended and enhanced. Powerful

Features: SomeObject Desktop allows to develop desktop applications in standard Java development. SomeObject Desktop allows you to develop Windows Forms or DirectX/ OpenGL/ Direct3D applications. The system also supports popular Virtual File system and social networking to enhance user experience.

Up-To-Date: SomeObject Desktop is up-to-date to latest version of Java and

Microsoft.NET (C#, Visual Basic, C++). It is actively maintained and documented. You can find out more details at
