You can use the generated key in the C:\Windows\SysWOW64\config\systemprofile\AppData\Roaming\Autodesk\Autocad.mxc\pixmaps and copy the one of this path and rename it to autocad.ico and autocad.mf. Then you can put it into the C:\Windows\SysWOW64\config\systemprofile\AppData\Roaming\Autodesk\Autocad.mxc\launcher_cache_run_time\launcher_cache.xml. Open this file with Notepad. Look for "autocad.ico" at the end of this line: autocad.ico Copy the data. And paste it into the line that starts with : autocad-autocad.ico Commit Message This patch adds support for variadic macros in LLVM. This is a convenient way to call functions with variadic arguments from a higher level language. It also adds the necessary feature to the preprocessor to work with variadic macros in the generated code. The original authors of LLVM/lib/Transforms/IPO/ExpandVariadic.cpp did not want to add it because they were scared of the compiler experience. The code should be pretty generic in that it's a no-op most of the time. There are some exceptions like when a condition returns a non-void value, where we have to do something special. ## What's New in the AutoCAD?

Link CAD drawings together: As drawings connect with each other in 3D space and evolve over time, CAD files used by colleagues or future generations might be out of date. Link all these drawings together automatically into one single view, so that all links and metadata stay with the original drawing, and the original drawings can be updated, too. (video: 4:48 min.) Project Shares: Share a drawing with others by e-mail, group chat, and file transfer. Project Shares is a free service to help you get work done better. (video: 4:10 min.)
