Checker X is a practical
and effective utility

whose main purpose is to help you check and locate similar content inside text documents and webpages. The utility is specially intended for users including teachers and students who need to find out the percentage of plagiarism and original data over the Internet. It scans your entire documents and

displays the results in seconds. When you open the application for the first time, you are required to load a new document. The entire content is displayed in the lower part of the main window, then the utility allows you to check the entire document, or only paragraphs and

webpages. It takes few seconds to calculate and show you the percentage of the copied material along with the web sources. After the scanning process is finished, the utility prompts you with a small message box that allows you to open the report. This way, you can view the total number of

What's New In?

The Plagiarism Checker X is a useful tool that can be used for searching similar or identical content found within several documents. This product is an easy-to-use tool that allows you to locate duplicate content inside multiple text documents such as

articles, manuals, webpages, PDF files, books, etc. The application was designed to identify various types of similar content found inside the text documents or webpages. In addition, it allows you to extract specific keywords from text files, and then displays a detailed report that can be viewed,

printed and saved. The Plagiarism Checker X also provides you with the “Side by Side Comparison” feature that allows you to compare the content of one file with another. It also allows you to scan multiple sources to locate the similarity percentage inside the files. This feature also allows you to

save the scanned documents to a separate folder, and gives you the opportunity to change the scanned text format. You can also set the parameters of the tool to select the number of duplicate results, and also the time it will take to perform the scanning process. What's New in this Release: Version 1.1:
