Awesome Wednesday: Cover Girl Yesterday we posted up about the amazing new Hanes Pure & Natural Cares foundation liquid foundation that retails for just $12. Keep reading to find out how to get your own!! Cover Girl is like an American dream come true: $12. It's affordable, it's lightweight, it's long wearing, it's natural, and it works all over! For such a lovely formulation to be available to us all here in the States, we had to jump at the chance. Hanes, being the top-grossing American clothing company, has a strong foothold in the U.S., and we knew there had to be a $12 foundation out there somewhere. After five hours of researching, we finally found it, in the form of a Cover Girl Liquid Foundation from its line of foundations called Pure & Natural. The line includes about a dozen products ranging from beauty and eye makeup to liquid foundation, concealer, and even toner. The Cover Girl Foundation retails for $12 for each one ounce jar, which is about $8.30 per ounce. That might seem a little costly, especially when you compare it to products like Benefit's The POREfessional, which retails for about $18.50 per ounce, but Pure & Natural is clinically proven to be effective and generally considered to be the best liquid foundation on the market. The foundation itself has a long-lasting semi-matte finish that doesn't make your face look cakey. It does what Cover Girl products are supposed to do: provide a base for your makeup to shine through to look like you put some time and effort into it. On my face, it's very sheer and light-weight, which means it can be used for all skin types and for all skin colors. This cover girl is the ultimate in sheer foundation, and the label on the bottom of the jar states that it's not suitable for those with very oily skin, or for those with certain eye creams or foundation products that would make it patchy. It does require a little eye cream to hide the fact that it's there, though, and a primer underneath to make sure it doesn't cake up into your facial pores. I used the Rimmel Stay Perfect Matte and Primer foundation primer, which I like. It's a light texture, and

The invention is particularly directed to an improved, an internally threaded pushpin used to secure a printed or adhesive decal ribbon to a badge such as a medical identification badge or the like. When the pin is placed through the surface of the badge, the pin extends partially through the badge, protruding from the back of the badge. The pin may then be removably threadably secured in an externally threaded receptacle, usually of a plastics material, by rotating the pin with respect to the receptacle. The pin, receptacle combination is then secured to a surface, such as a clothing item, by the projecting end of the pin passing through a loop of material secured to the surface. The receptacle or loop may be made of a tough, flexible, resilient material. The receptacle may also incorporate a threaded aperture or bore through which the end of the pin protrudes. One of the main problems in the pushpin industry is the need to insert the pin through the surface of the badge or similar item. Since the badge is usually rigid and large, insertion of the pin into the badge is difficult and may damage the badge.Within 24 Hours After Hit and Run, South Bend Police Deparment Arrest David Bishop in St Petersburg, Florida for Grand Theft Felony 7/18/2009 On June 30, 2009, David Bishop was arrested by South Bend, Indiana police for felony hit and run charges.
